

Architecture Fair (AFAIR) 2020

"Us Within Us Without"

Exhibition of Indonesian Architecture Student Works

Jakarta, 28 January 2020—Department of Architecture Universitas Indonesia in collaboration with Galeri Nasional Indonesia and APTARI (Asosiasi Pendidikan Tinggi Arsitektur Indonesia) will hold AFAIR (Architecture Fair) 2020 on January 28th – February 9th 2020 in Gedung C Galeri Nasional Indonesia. This biennale education program is seen as an attempt to reposition the existence and the role of architecture in environmental context and everyday life.

AFAIR 2020 came up with the theme *"Us Within Us Without"* which revolves around two conditions; *"Us Within Architecture"* and *"Us Without Architecture"*, to question our understandings on architecture, how architecture not only has roles on our everyday lives as users but also has impact on the connections between us and the environment.

According to the Curator of AFAIR 2020 Yandi Andri Yatmo, this event encourages to change our perspective that had been oriented toward "I" as a human being who have to met the needs, to "us" as a wider ecology and cultural network that needed to be constantly balanced. "AFAIR 2020 becomes a place for the discourse on various knowledge related to aesthetics, materiality, tectonic, culture, technology, and ecology," said the Professor of Architecture at Universitas Indonesia. AFAIR 2020 aims to educate the people about architectural education in Indonesia and pushing the reorientation of curriculums for a more meaningful architecture. This event aims to encourage society to wider open their eyes towards recent issues around us such as climate change, ecological problems, locality and materiality, and problems in society, community, and individuals, also the importance of responding those issues in order to achieve a better living environment.

AFAIR 2020 is presented through various events including competition, discussions, workshops, and exhibition to reflect to the role of architecture in current situations and challenges. 214 artworks overall consisting of two and three-dimensional works including maquettes, installations, and visual displays (diagrams, photographs, text, videos, etc.). Those 214 artworks consist of 105 curated architecture students' works from 62 universities/institutions that are members of APTARI (101 works are exhibited, four other works are presented in the public discussion) and 109 curated students of Department of Architecture Universitas Indonesia's works.

AFAIR 2020 will also hold presentations of architecture students' works from all over Indonesia and public discussions. Discussions features architecture practitioners and academics: Andi Subagio, Yu Sing, Alvar Mensana, Achmad Hery Fuad, Achmad Noerzaman, Eko Prawoto, Kemas Ridwan Kurniawan, and Buky Sosiawan, will talk about climate change, locality and materiality, and urban problems. Several reviewers are also invited to review 105 architecture students' works from 62 universities/institutions that are members of APTARI: Ariko Andikabina, Realrich Sjarief, Arneyn Ilyas, Astrid Susanti, Sigit Kusumawijaya, Firmari Herwanto, Ahmad Saladin, Farrizky Astrawinata, Erick Budi Yulianto, Resza Riskiyanto, and Gustav.

During this main event, *"Urban Detox"* of AFAIR 2020's competition for students of architecture, interior architecture and interior design will be held as well, in which the selection has been held on January 17th 2020. As the peak of this competition, three best finalists will present their works and each will be given a symbol of appreciation.
